

**Since 1950,**  
milk production  
has increased  
by 60%

This has been  
accomplished with  
16.4 million  
fewer  
cows

78% less feed

65% less water

90% less land

**INVESTORS**  
COMMUNITY BANK

The resulting  
total carbon footprint  
of 1 glass of milk has  
decreased by 63%
